**MEDPLAST UPGRADES TEMPE, AZ FACILITY  
AND ADDS A 2ND CLEAN ROOM**

**(Tempe, AZ – September 20, 2009)** MedPlast recently upgraded its 50,000 square foot Tempe, Arizona facility. The upgraded plant now includes two class 100,000 clean rooms, which house injection molding and automated assembly operations. The former general molding area has also been transformed and is now a white room.

MedPlast's Tempe operation is a medium to high volume medical manufacturing facility with a diverse product line. It primarily manufactures injection molded disposable medical products and diagnostic components. Engineering, newly upgraded tool room, quality control, and corporate headquarters are also housed in this location.

"Due to the stringent manufacturing requirements of some of our major medical customers, the entire facility has been upgraded including the tool room where mold maintenance can now be done in a clean environment and is separate from design and construction," said Chris Morton, chief operating officer. "The renovation of our Arizona facility gives us greater capacity for clean room molding and allows us to better serve our customers located in the Western U.S. as well as those located in Mexico," said Morton.
