

COMPANY BACKGROUNDER

Headquartered in Tempe, AZ, MedPlast is ideally suited to servicing the healthcare and consumer/industrial markets. The company offers a variety of specialized services to its customers ranging from product development services and mold manufacturing to specialty rubbers, silicone formulation and molding to multi-material, over molded and insert molding of thermoplastic materials and assemblies.

With over 20 years of experience, MedPlast provides its customers with highly skilled manufacturing expertise and precision manufacturing capabilities in five world class facilities located in Arizona, Iowa, New Jersey, Pennsylvania and Wisconsin. Key to the markets the company serves is MedPlast's ability to offer a total integrated manufacturing solution from materials formulation to product prototyping and design through packaging.

Customers benefit from MedPlast's strict quality focus and its driving principles of six sigma and scientific molding. The company provides certified clean room manufacturing and assembly in cGMP and ISO-13485 compliant environments. Certified black belt and green belt teams are empowered to drive quality and productivity. These processes along with dedicated customer focused engineering teams provide assurance of program continuity, cost efficiencies, and quicker deliveries.

MedPlast operates five plants with approximately 700 employees and 375,000 square feet of manufacturing space with over 200 thermoplastic and elastomer molding presses.

Some of its key areas of expertise include:

- Custom elastomer, polyisoprene, and silicone compound development
- In-house prototyping and multi-cavity mold manufacturing
- Silicone and elastomeric molding
- Thermoplastic injection molding
- Multiple shot molding, over molding and insert molding
- Clean room molding and assembly
- ISO 13485 compliance

A highly experienced management team is lead by Harold Faig, CEO, at the company's headquarters in Tempe, AZ. He has spent over 40 years in plastics and contract manufacturing, most recently as the CEO of The Tech Group. Prior to this tenure he was President and COO of Milacron, Inc.

FACT SHEET

- MedPlast is one of the nation's premier sources of precision custom-molded components for use in a broad spectrum of the medical and healthcare markets where technology, precision, speed-to-market and synergistic skills in rubber, silicone and plastics are vital.
- The company is headquartered in Tempe, AZ
- The company has five world-class manufacturing facilities around the country located in Arizona, Iowa, New Jersey, Pennsylvania and Wisconsin.
- MedPlast provides certified clean room manufacturing and assembly in cGMP and ISO-13485 compliant environments.
- The company operates on a six sigma philosophy with certified black belt and green belt teams.
- Five manufacturing facilities across the U.S. have over 375,000 square feet of manufacturing space and over 200 plastic and elastomer molding presses.
- Approximately 700 people are employed at the various U.S. plants.
- Key areas of expertise include:
 - Custom elastomer, polyisoprene, and silicone compound development
 - In-house prototyping and multi-cavity mold manufacturing
 - Silicone and elastomeric molding
 - Thermoplastic injection molding
 - Multiple shot molding, over molding and insert molding
 - Clean room molding and assembly
 - ISO 13485 compliance
