MedPlast Expands New Jersey Tooling Facility

MedPlast has expanded its New Jersey facility to accommodate new equipment and clean manufacturing processes.

[MedPlast](#) (Tempe, AZ) has expanded its mold-manufacturing facility in West Berlin, NJ, to accommodate new equipment. Specializing in complex molds for the medical and industrial markets, the facility has added high-speed CNC machining centers and EDM machines with robotic tool-changing capabilities. The company has upgraded and redesigned the plant to improve its clean manufacturing processes, as well as to improve efficiency. Offering such services as overmolding and multishot molding, the company also has design and prototyping capabilities. It operates five facilities in the United States and plans a similar expansion at its Tempe, AZ, plant this year.
