Facility expansions for *MedPlast*

MedPlast (Tempe, Arizona) reported the expansion of its 70,000-square-foot facility in Westfield, Pennsylvania. The upgraded facility now includes a 45,000-square-foot clean room, which houses class 100,000 and class 10,000 molding and assembly operations. More than 60% of the facility's square footage is now dedicated to certified clean room production.

MedPlast's Westfield facility offers contract thermoplastic and elastomer manufacturing for customers in the healthcare and medical device industry. The company specializes in medical and surgical disposables such as syringes and other components used in fluid and IV delivery systems such as drip chambers, Y-sites, and male/female luer adaptors.

"Along with our engineering expertise and technical resources, **MedPlast** has extensive experience in thermoplastic and elastomer molding and assembly, enabling us offer custom designed products to our OEM partners," said Rich Aiello, general manager of **MedPlast** Westfield "The expansion of our Pennsylvania facility will provide better service in a controlled environment for our customers that demand highly specialized products manufactured to exacting standards."

MedPlast recently announced an expansion and new tool room upgrade at its West Berlin, New Jersey, facility, and a similar expansion is under way at the Tempe manufacturing plant.
